

Read me

This Software was developed by Darren Campbell for the Thrive Programme.

It was developed as part of a university project for Final year.

The System was developed using Netbeans IDE.

It is connected to my allocated PHP my admin database.

To run the software it must be uploaded.

Dash Gum dashboard used as a basis for development.

For maintenance purposes a blank.html file is available to recreate the latest design including navigation links.

Developed in 2019 Submitted in March.
